Summary

A Frontend Developer skilled in React.js, Tailwind CSS, and building responsive web apps. Passionate about learning, solving real-world problems, and contributing to innovative projects. Motivated to gain hands-on experience in a collaborative tech environment.

Experience

Junior Frontend developer

Freelance, Nigeria

Mar 2024

- I built an attendance portal with Tailwind CSS and JavaScript featuring secure login, role-based access, full Create Read Update Delete (CRUD) functionality, and database integration. This experience improved my debugging, scalability, and deployment skills while helping me design user-friendly interfaces.
- I also created a Netflix-style clone using React and CSS, focusing on responsive layouts, reusable components, and API integration for dynamic movie data. Deploying it on Vercel and managing it with Git/GitHub sharpened my attention to detail and gave me confidence in building real-world applications.
- Through the Dessert Project (a Frontend Mentor challenge) built with Tailwind CSS and JavaScript, I honed my front-end skills using semantic HTML, CSS Flexbox/Grid, and clean coding practices to produce a visually appealing and responsive layout.
- I developed a movie app with React and CSS, gaining experience in component-based development, state management with hooks, API integration, error handling, and responsive UI design, also deployed on Vercel.

Together, these projects showcase my ability to build practical, scalable, and user-focused applications.

Education

Bsc Public Administration (in view), Kwara State,
University of Ilorin

Skills

- Web Development - HTML, CSS, JavaScript
- Web Development Frameworks-React.js,Tailwind CSS
- Communication Skill
- Problem Solving Skill

Hobbies and Interests

- Vibe Coding
